

**International College of Prosthodontists
19th Biennial Scientific Session - VIRTUAL - September 22 – 25, 2021**

Program Speaker – Damian Lee

Title

Alternative Approach to Full Arch Implant Restorations

Abstract

This presentation will go through the restorative options for edentulous patients seeking full arch dental implant restorations, from removable to fixed restorations. This presentation will cover the alternative consideration for treatment options, location, prosthesis design, and material used for the treatment of edentulous patients.

Objectives

- Understand the different consideration involved in location of dental implant placement, especially in the mandible for full arch implant restoration.
- Understand the alternative approach for prosthetic design for full arch implant restorations.
- Understand the different dental materials used for implant-supported fixed prostheses including zirconia and polymers.

Biography

Dr. Lee is originally from Ann Arbor, MI where he graduated from University of Michigan with a Bachelor of Science in Movement Science. He received his Doctor of Dental Surgery from the University of Michigan. Upon the completion of dental school, he was trained at the University of Illinois-Chicago Advanced Prosthodontics Program, receiving a certificate and Master's degree in oral science. Dr. Lee has been in academia since 2007 and he is currently the Director of the Advanced Education in Prosthodontics Program at the The Ohio State University College of Dentistry. He also maintains a prosthodontic practice at OSU Dental Faculty Practice.
